

NGUYEN PHUC THANH

Hanoi, Vietnam | 033 281 2606 | thanhng224@gmail.com | <https://github.com/ThanhNg224>

OBJECTIVE

Full-stack developer with a strong focus on **Android native development** (Kotlin/Java), while also experienced in cross-platform and backend technologies (Flutter, React, Node.js). Passionate about building reliable, well-architected mobile applications.

Check out my portfolio at: thanhng224.github.io/react-portfolio

EDUCATION

Hanoi University of Science and Technology – HUST

B.Sc. in Multimedia Engineering (Advanced Program)

Hanoi, Vietnam

2021 – 2025

LICENSES AND CERTIFICATIONS

IELTS Academic - 7.5

Issued by IDP Education Co., Ltd

September. 2024

EXPERIENCE

eUp Technology Joint Stock Company (eUp Group)

Android Developer (High-Scale App Development & Product Optimization)

Hanoi, Vietnam

June. 2025 – Oct. 2025

- Developed and optimized large-scale consumer Android applications using modern **Kotlin/Jetpack**, emphasizing robust **Clean Architecture**, modular code structure, and smooth UX across a high-traffic user base.
- Collaborated in a multi-developer environment using strict **Git Flow**, code review standards, CI/CD pipelines, and scalable feature rollout strategies.
- Integrated AdMob and selected third-party SDKs for analytics and monetization while maintaining performance and codebase cleanliness.

ATIN – Advanced Technology Innovations

Fullstack Developer (Mobile Focus)

Hanoi, Vietnam

July. 2024 – June. 2025

- Develop and maintain Android applications for biometric face-terminal and kiosk systems, working with both legacy **Java/XML** and modern **Kotlin/Jetpack** codebases.
- Integrate biometric and hardware SDKs (camera, NFC, face recognition) into production systems to ensure accuracy, performance, and stability.
- Collaborate with backend and design teams to deliver full mobile solutions for enterprise clients such as **Viettel** and **SunGroup**.
- Contribute to improving app architecture, refactoring legacy modules, and maintaining high code quality through reviews and testing.

FPT Software (Training Internship)

C++ Training Program

Hanoi, Vietnam

May. 2024 – July. 2024

- Completed an intensive C++ training program focused on algorithms, data structures, and software engineering fundamentals.
- Gained practical experience in object-oriented programming and collaborative software development.

NOTABLE PROJECTS

Below are just a few of my notable projects. Feel free to explore my GitHub for more!!!

File Recovery – Smart Android Media Restoration App | *Kotlin, MVVM, Hilt, Jetpack, Coroutines, Material 3, Ads SDK (IAA)*

Team Size: 1

GitHub: https://github.com/ThanhNg224/mb01_file_recovery

- Developed a full-featured Android app that scans, previews, and restores deleted media (images, videos, audio, documents) without root access.

- Integrated **In-App Ads (IAA)** via a custom JitPack SDK for banners, interstitials, and rewarded ads as the core monetization system.
- Architected with MVVM + Hilt for modularity, coroutine-based I/O for performance, and adaptive permissions for Android 11+ Scoped Storage.

Device Management System – Android OTA Agent & Monitoring Platform (Built for SunGroup’s SunWorld) | *Kotlin, JavaScript, Node.js, Next.js, MongoDB,*

Team Size: 2

GitHub: https://github.com/ThanhNg224/device_management_full

- Developed a lightweight **Kotlin agent** for Android-based face terminals to perform silent APK installations and background updates.
- Built background services to collect telemetry (CPU, RAM, storage), send real-time status via WebSocket, and store logs for later analysis.
- Integrated with a web dashboard (Next.js + Node.js) to trigger OTA updates, view device logs, and track online/offline status.
- Ensured reliability with retry mechanisms, secure downloads, and modular architecture for maintainability.

Viettel EID/Passport Verification App – Android Kiosk Solution (Built for Viettel, based on official Figma designs) | *Kotlin, MVVM, Jetpack, ML Kit, REST API*

Team Size: 1

GitHub: <https://github.com/ThanhNg224/Viettel>

- Developed an Android kiosk application in **Kotlin** for CCD/passport verification, deployed on Joyusing Z10S Pro devices.
- Integrated third-party SDKs provided by device manufacturers to access camera, NFC reader, and hardware-level biometric modules.
- Implemented full identity verification workflow including document capture, MRZ OCR, NFC chip reading, and face-matching via Face Engine API.
- Connected with Viettel backend systems for data validation and integrated **VNPAY sandbox QR payment** and digital signing modules.

DSoft – Spa Management Application | *Flutter, Dart, BLoC Architecture*

Team Size: 1

GitHub: <https://github.com/ThanhNg224/DSoft>

- Developed a Flutter-based spa management application with Clean Architecture and custom BLoC framework.
- Implemented modules for customer, staff, service, booking, and financial management, along with reporting and multi-language support.
- Designed scalable architecture with reusable UI components and secure, token-based authentication.

Coffee Shop Website & Android App | *JavaScript, ReactJS, NodeJS, React Native, MySQL, Expo*

Team Size: 3

GitHub: <https://github.com/ThanhNg224/CoffeeShopProject>

- Built a coffee shop website and Android app with distinct user and admin roles, leveraging Node.js for the backend and MySQL for data.
- Implemented user features like product browsing, account management, rating/review, and feedback submission.
- Developed an admin panel for inventory management, sales data, user oversight, and review moderation.
- **My Role:** Focused on front-end and mobile development — built the ReactJS interface, connected APIs, and developed the React Native app for Android using RESTful integration.

TECHNICAL SKILLS

Languages: Kotlin, JavaScript, Dart, Python, SQL

Mobile Development: Android Native (Kotlin/Java), Flutter, React Native

Web & Backend: ReactJS, NextJS, NodeJS, Flask, MySQL, MongoDB

Tools & Others: Git, Firebase, Linux, ML Kit, OpenCV

HONORS AND AWARDS

Third Prize in District Chemistry Competition

Issued by Haiphong Department of Education and Training

HaiPhong, Vietnam

Dec. 2020
